

Short presentation

My main interest is film theoretical and I have long been focused on film acting and the power of performances for affecting our experience of moving image narratives. I'm the author of *Spilletets kunst* (2003) on emotions and nonverbal meaning, and I have contributed to encyclopedias, anthologies, and journals on this and other issues. Currently I'm working on a book-length study of film acting styles between 1920 and 1980, addressing American, European and Asian actor-director collaborations. I'm particularly interested in cognitive film theory and have attended the SCSMI conferences for years. A secondary interest is that of media industries, in particular issues of distribution and ownership, and I have a particular liking for short film narratives.

I have been teaching course on film theory and analysis, as well as institutions and organizations, including a course concurrent with students' internships. Since 2005 I have been a member of the board at Society for Cognitive Studies of the Moving Image, since 2017 on the board for Carl Th. Dreyers Mindefond.

Curriculum Vitae (ENGLISH)

Johannes Riis
